

SANTHOSH SOWMY KALPANA

AI & Analytics Program Manager | Business Analyst | 3+ YOE

Chennai, Tamil Nadu | 9150697815 | santhosh.kalpana17@gmail.com | www.linkedin.com/in/santhosh-kalpana

PROFESSIONAL SUMMARY

AI and Analytics program leader with 3+ years of global experience (USA) leading enterprise-level programs at a Fortune 500, bringing a blend of technical depth and strategic program management. Spearheaded 30+ AI-powered Databricks dashboards that automated reporting workflows and saved 100+ hours monthly, accelerating digital transformation across finance, manufacturing, sourcing, and supply chain. Skilled at crafting roadmaps and execution strategies, partnering with division leaders to translate challenges into high-impact AI & Analytics solutions, and owning end-to-end product delivery from requirements to adoption.

EDUCATION

Texas A&M University, College Station, Texas, USA

Aug 2021 - Aug 2023

Master of Science in Industrial Engineering - Data Science & Operations Research

Moscow Aviation Institute, Moscow, Russia

Aug 2017 - May 2021

Bachelor of Engineering in Aerospace Engineering

TECHNICAL TOOLKIT

AI & Analytics: Data Storytelling, Dashboarding Generative AI, Machine Learning, Predictive Modeling

BI & Data: Power BI, Qlik, Databricks, SQL, Python, Alteryx, Excel, Essbase

PM & Domain: Azure Devops, Agile, Project44, Optilogic Cosmic Frog, IBM LogicNet, AMPL, SAP BW

PROFESSIONAL EXPERIENCE

Senior Business Analyst (AI & Analytics Programs) - Lennox International

Mar 2025 - Present

Richardson, Texas, USA

- Led **enterprise-wide AI and analytics programs** across finance, manufacturing, sourcing, and supply chain.
- Hosted workshops to identify business challenges and translated that into **high-impact AI & Analytics** projects.
- Owned end-to-end project delivery from defining PRDs, user stories, stakeholder alignment, acceptance criteria, leading UAT to ensuring successful Go-Live implementation.
- Authored **wireframes** and got business alignment before development, cutting down UAT time by 20%
- Shipped Databricks AI ecosystem with **Genie-powered dashboards and autonomous research agents** embedded into business workflows, replacing manual reporting cycles for VP/Director-level stakeholders.
- Spearheaded design and implementation of **30+ AI-powered Databricks dashboards**, automating reporting workflows and saving 100+ hours per month while enabling real-time decision-making across operations.
- Managed large-scale migration of analytics dashboards from Qlik and Power BI to Databricks COE Catalog.
- Partnered with **SAP teams** to identify source tables and build connectors/ CDS views to ingest into data lake.
- Collaborated with **Data engineering** to build pipelines, and **BI team** to develop story telling dashboards.
- Led **UAT** through multiple iterations, planned go-live, and executed **project closure, and sign-off** procedures.
- Reduced cross-functional communication gaps by 40% using RACI framework, improving execution efficiency.
- Increased product adoption by 22% and user-experience metrics by 30% by providing stakeholder demos and conducting hands-on training workshops for the field.

Business Analyst - Lennox International

Sep 2023 - Feb 2025

Richardson, Texas, USA

- Built data workflows to source, clean, and validate data that's feeding into network design modeling.
- Assisted Network design (digital twin) and scenario modeling to achieve strategic long-term goals.
- Translated results into actionable insights for SCL and Finance leaders, recommending network changes.
- Led Gold Service program for a \$45M dealer, orchestrated cross-functional analytics team to diagnose OTIF bottlenecks, improving OTIF from 78% to 93% and unlocking **\$6M in incremental revenue**.
- Cost avoided **\$1.2M yearly** in out-of-network shipping costs by building real-time tracking dashboard.
- Saved **\$239K** by performing what-if analysis to optimize carrier and recommended operating constraints.
- Built database with **predictive modeling** to estimate accrual costs with **94% accuracy**.
- Build dashboards, performed advanced analyses, and ad-hoc reports to support leadership decision making.

Supply Chain Intern - Lennox International

Jun 2023 - Aug 2023

Richardson, Texas, USA

- Performed **cost-benefit analysis** for reusable pallet transition and got competitive quotes from suppliers.
- Used statistical analysis and projected **\$1.4M ROI** and presented a data-driven POC to leadership.

Engineering Intern - DMG Mori Pvt Ltd & MAI

May 2019 - Jul 2019

Moscow, Russia

- Optimized G-code to improve cut orientation - reduced raw material usage by 17% and cycle time by 23%.

PROJECTS

Generative AI - Vision LLM-Powered Invoice Extraction Automation

- Built an AI-powered invoice extraction automation using locally hosted Qwen2.5-VL **Vision LLM** via **Ollama**.
- Extracted invoice data from PDF/images, storing outputs in a database for downstream analytics.
- Integrated data into Celonis and built dashboards to track actuals vs planned performance.

Machine Learning Project - Predicted Transportation Cost using Shipment Data

- Developed a model to predict accrual freight costs for non-invoiced shipments using shipment-level data.
- Performed data preprocessing, feature engineering, trained Random Forest and XGBoost regression models.
- Evaluated models using RMSE and selected XGBoost for superior accuracy and reduced prediction errors.

ML Ops Project - Freight Cost Prediction Model Deployment

- Operationalized the model in Databricks by managing reusable model artifacts and inference workflows.
- Stored trained models and route-level feature mappings in Databricks volumes for scalable deployment
- Built an interactive inference application to generate freight cost predictions from user-provided inputs.

CORE COMPETENCIES

- | | |
|--|--|
| • Enterprise AI & Analytics Program Management | • AI Use-Case Scoping & ROI Prioritization |
| • Data-Driven Roadmaps & Execution Strategy | • Cross-Functional Delivery (ERP / DE / BI) |
| • Business - Tech Translation & Use-Case Scoping | • Digital Transformation & Change Management |
| • Stakeholder Management (GM / VP / Director) | • Unit Testing, UAT, Go-Live & Project Closure |

CERTIFICATIONS

MITx SCM MicroMasters Program - MIT Center for Transportation & Logistics (*ongoing, Feb 2026*)

Lean Six Sigma Green Belt - Six Sigma Academy Amsterdam (*May 2023*)
